Crop Weather Report

Released: 2:00 p.m., MST, April 24, 2006 For the Week Ending: April 23, 2006

Issued: Weekly: April-October Monthly: November-March

USDA, NATIONAL AGRICULTURAL STATISTICS SERVICE Montana Field Office 10 West 15th Street, Suite 3100

Helena, MT 59626

1-800-835-2612Fax 1-800-915-6277 nass-mt@nass.usda.gov

Agricultural Summary

Heavy, wet snow blizzards occurred across many Southeast and locations in Montana last week. northeast Montana were hit the hardest by the snow, and several cities experienced downed power lines and dangerous road conditions. Nine locations across central and southwest Montana reported accumulating enough moisture, as of last week, to make this April the wettest on record for those areas. As of last week, twelve other locations are at their second wettest April on record. Great Falls has experienced its wettest water year since 1966, and its third wettest water year on record. Bozeman has accumulated enough moisture to make 2006 the third wettest water year on record. Ekalaka was the wet spot of the state last week with 3.63 inches of precipitation. Fort Benton experienced the high temperature last week of 80 degrees. West Yellowstone was the cold spot of the state at 9 degrees. Topsoil moisture adequate and surplus is 91 percent, ahead of last year's 67 percent and the five-year average of 54 percent. Subsoil moisture adequate and surplus, at 72 percent, improved from last week's 63 percent, and is well ahead of the five-year average of 30 percent.

The weather outlook for May 1st through May 7th is for above normal temperatures and below normal precipitation east of the divide, and for above normal temperatures and below normal precipitation west of the divide. Normal temperatures for this period are for highs mid 50s to the mid 60s, and for lows in the mid 20s to the lower 40s.

Field Crops Report

Some areas have slowed or delayed field work due to heavy precipitation over the last week. Small grain planting remains behind last year and behind the fiveyear average. Winter wheat condition has improved with 69 percent good and excellent, compared to last week's 60 percent, and is better than the five-year average of 39 percent. Eighty-eight percent of the winter wheat is green and growing, with only 1 percent still dormant.

Field Tillage Work in Progress											
None	44	61	23	31							
Just Started	22	25	23	27							
Well Underway	34	14	54	42							

Livestock Report

Heavy snow in concert with high winds caused an increased rate of calf and lamb loss in some areas of the state, and has impeded calving and lambing in those areas. Range and pasture feed condition continued to improve last week. Operators are reducing the amount of supplemental feed given to cattle and sheep, anticipating pasture will open up with the coming warm weather.

Livestock Table	This Week	Last Week	Last 5 Y Year Ave						
Range and Pasture Fee	i c ai	AVE
